

Within the Clinical Skills and Simulation Centre, students have the opportunity to practice skills in physical assessment and clinical examination, as well as a range of clinical skills. In addition students will enhance their care, compassion

A Centre Dedicated to Professional Growth

The Centre is equipped with the latest education and simulation facilities and has a number of dedicated rooms specifically designed for nursing, midwifery, physiotherapy, occupational therapy and paramedic science students. All disciplines benefit from an array of bespoke equipment relevant to the discipline and this is enhanced and/or updated on a yearly basis.

All simulation suites can become flexible learning spaces
